

PRESS RELEASE

December 23, 2023

The reference event for the poultry and animal nutrition sector in Latin America and Brazil, LPN Congress, returns to Miami on October 17, 18 and 19, 2023.

This year, under the technical direction of a multidisciplinary and internationally recognized team, LPN Congress & Expo will be presented again with a renewed, interactive and didactic technical program that will surprise all attendees.

For this reason, for this next edition we wanted to reflect and expand the congress to another great sector that has been gaining more and more relevance in Latin America, the swine sector.

LPN Congress 2023 will include the incorporation of the first edition of the porciFORUM LATAM Edition, a space reserved for all veterinarians, technicians and professionals involved in the swine sector. In fact, Latin America is already a benchmark within the sector and has the resources, manpower and technologies to become a global reference.

The porciFORUM represents a reference event in Spain, the third largest pork exporting country in the world, and will bring together different experts of the sector to provide an excellent technical representation on the most current topics that are affecting the Latin American pork sector.

Its proximity, language and large Latino population make Miami an ideal destination to bring together poultry and monogastric nutritionists from all over Latin America, and the Miami Airport Convention Center is the chosen venue for this great event. This fantastic and extraordinary convention center offers ideal facilities to host an event of this category with 16,000 m² of exhibition area, a
